

## README

In order to run the code you should do the following.

- Run FinalExam.m file, which executes all questions.

**libsvm** library (suggested in 3<sup>rd</sup> assignment) has to be installed in the current directory. Otherwise the train function in Q4 will not work. If there are problems concerning train function in Q4 then try running Q4 alone after cleaning the variables in the workspace.

All input data should have been placed in a folder named StatMLExam under the current directory.
